

Wheel suggestions

1- This wheel from lampatronics

Price : 25 L.E

<http://lampatronics.com/product/wheel/>

- It was rejected because of bad material BUT unfortunately there is no other types of wheels

2-This wheel from future-electronics

Price : 50 L.E

<https://store.fut-electronics.com/collections/mobile-robot/products/robot-wheels-tire>

- It's too similar to the first wheel so we rejected it too

So we had some ideas to find an suitable one such as taking the wheels from an old toy car
